

# SM ENGINEERS

The logo consists of the letters 'SM' in a bold, dark blue, sans-serif font. The 'S' is stylized with a horizontal bar at the bottom. The 'M' is also bold and blocky. The logo is centered within a white circle that has a thick blue border.

“We are your complete automation solution supplier providing leading industrial automation & control products.

## **OPERATION & MAINTENANCE**

We offer operation and maintenance of water, sewage, RO, and effluent treatment. We offer complete solutions to our clients and help them concentrate on their key business activities.

We provide complete support for optimum utilization of existing plants. We offer detailed revamping and augmentation options. We offer the following services for revamping and augmentation of plants

## **REVAMPING OF EXISTING TREATMENT PLANTS**

## **ERECTION & COMMISSIONING**

When we recommend a product, we can also assist you with its configuration and commissioning. Reduce the time between project integration and actual start-up with SM Engineers' Commissioning Services.

SM Engineers specialize in PLC, Vision, HMI, Servo, Comms, and SCADA programming, from hardware and software upgrades for new projects to making modifications to an existing system.

## **PROGRAMMING**

## **PANEL BUILDING**

We take the stress out of any project's design, construction, testing, and commissioning with our in-house panel building services. Providing professional electrical drawings in the latest software suites lets build your next control panel.

SM Engineers is available to provide fast, dependable technical assistance to your company's needs, whether it's emergency breakdown assistance, system upgrades advice, new project consulting, product end-of-life planning, or general product servicing.

## **ONSITE SERVICING**

## **Automation System**

Automation is the best option for various industries to ensure sustainability. In addition to operational efficiency, it is also the primary choice for businesses to make their plant operations better controlled.

## **Instrumentation**

SM Engineers sources, installs, commissions, and offers various types of Flow Transmitters, Level Transmitters, Pressure Transmitters, Temperature Probes, Signal Conditioning, Pressure and Temperature Gauges, and Weighing & Load Cells products.

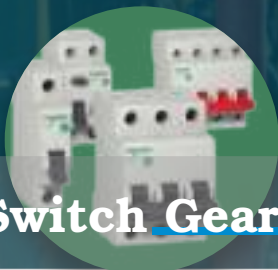

## **Lab Instrumentation**

A wide range of innovative lab instruments for water and wastewater applications and industries. Industry leaders trust us for pH meters, conductivity analyzers, TDS Analyzers, ORP Analyzers, SDI Analyzers, Turbidity Analyzers, and Silica Analyzers. DO Analyzers.

## **Control Components**

We installs, commissions, and offers various types of Flow Transmitters, Level Transmitters, Pressure Transmitters, Temperature Probes, Signal Conditioning, Pressure and Temperature Gauges, and Weighing & Load Cells products.

## **Switch Gears**

Safety components are required for safety counter measures in equipment and facilities. They are used for shut-out detection of mechanical guards, checking intrusion into hazardous areas, and building safety circuits.

## **Motion & Drives**

We offers an excellent range of variable speed drives, soft starters, and servo motors to help industries have better control over machine operations. We source and supply have proven solutions that can give accurate results to the requirements of our customers
